
HCF welcomes a high-profile senior industry executive to its team – Andor Lips

London, 10 March 2021

HCF International Advisers Ltd (HCF) is pleased to announce the appointment of Andor Lips as Senior Advisor. Andor's role will be focused on identifying high quality mining projects and the origination of advisory mandates across the mining sector globally.

With a doctorate in Geology and a wealth of experience in mining, exploration and banking – Andor also brings strong technical knowledge that further complements HCF's breadth of expertise and will assist in building out the profile of HCF globally.

"We are very pleased to have someone of Andor's mining calibre join the HCF team. His wealth of mining experience across the sector from exploration to mining corporate finance will greatly enhance the in-depth sector expertise of our team. Andor's background as geologist enables HCF to bring a deeper technical understanding of some of the key challenges that mining and exploration companies are facing and therefore enable us to structure tailored financial solutions"

Guy de Selliers, President and Co-Founder of HCF

Prior to joining HCF, Andor has held senior positions with Eldorado Gold Corporation, Lydian International Ltd, ING Bank N.V., the Commodity Discovery Fund, and BRGM, whilst also providing external expert advice to the European Commission (2010-2020) and UNESCO (2007-2012).

Andor has a doctorate and MSc in Geology from University of Utrecht, the Netherlands and he speaks Dutch, English and French languages.

About HCF

HCF International Advisers Limited is a London-based corporate finance boutique focused on the global metals and mining sector. HCF provides strategic and financial advice to mining companies across the complete project life cycle and the full capital structure, assisting in the sourcing of all classes of equity through to structured debt and alternative financing. HCF also has deep experience in working in emerging economies with a strong focus on the mitigation of political risk.
